

Lemur Diversity: Past, Present, and Future

Dr. Rachel Jacobs

Post-Doctoral Scientist

George Washington University

Join us in the discussion of Dr. Jacob's research in light of recent lemur extinctions and current threats to extant lemur lineages.

BIO: Rachel Jacobs is a Post-doctoral scientist in the Primate Genomics Lab at the George Washington University. Her research focuses broadly on the evolution of genetic and behavioral diversity in wild lemur populations. Dr. Jacobs will share some of her current research, which aims to identify the ecological, demographic, and anthropogenic factors that influence genetic variation in lemurs.
