## Dr. Chris Ruff

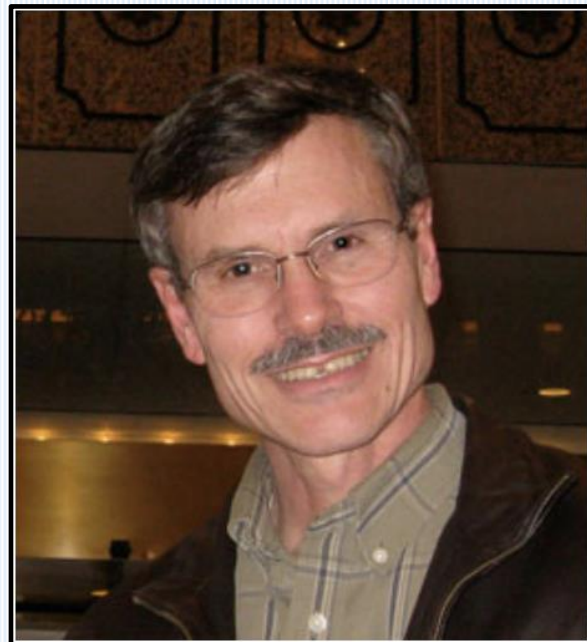

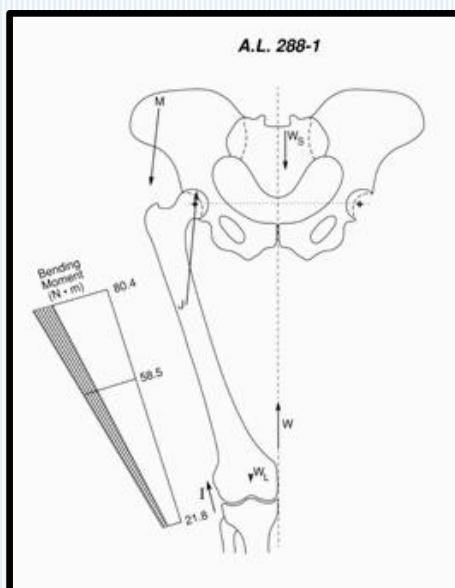

Johns Hopkins University School of Medicine

# "Locomotion and Body Size in Early Hominins"

**Date:** April 24,  
2020

**Time:** 3:30pm –  
5:00pm

**Location:** Room  
001, Ruth Adams  
Building

**Chris Ruff** is a professor at the Johns Hopkins University School of Medicine. He serves as director of the Center for Functional Anatomy and Evolution and also holds an appointment in the Department of Orthopaedic Surgery. He studies how variation in skeletal morphology is related to mechanical forces applied during life. He unites biomechanical skeletal-system modeling with comparative and evolutionary studies of both hominins and non-human primates.
